

PRESS INFORMATION 28. August 2018

Container extension for "OLI-AQUA POLISH 15.95 I Basic parquet care" - now available in a 5-litre canisters

The "OLI-AQUA POLISH 15.95 I Basic parquet care" in "matt" and "glossy" is available, in addition to the previous 1-l bottle, also in a 5-l- canister. Thanks to high-quality active ingredients, it quickly and easily protects newly sealed wood and cork floors or refreshes dull parquet.

The "OLI-AQUA POLISH 15.95 I Basic parquet care" in the practical 5-litre canister is the consistent container extension of Oli Lacke. The large container is suitable for parquet and floor layers as well as building cleaners, but also for end consumers who want to refresh and maintain large-area parquet floors quickly and easily. In addition, "OLI-AQUA POLISH 15.95 I Basic parquet care" is very economical. The 5-l-litre container is sufficient for up to 250 sqm and has an attractive price.

OLI-AQUA POLISH 15.95" brings a fresh shine to parquet flooring with high-quality active ingredients. It is recommended for initial care, for refreshing and after every basic cleaning of all sealed parquet and cork floors. In addition, it is excellently suited for the care of factory-made UV-sealed pre-finished parquet.

"OLI-AQUA POLISH 15.95" maintains the beauty of the floor for a long time and provides an additional care film, which prevents wear and tear of the sealant and protects against walking marks and scratches. The product is available in two gloss versions. While "OLI-AQUA POLISH 15.95" in "Matt" gives the surface a silky matt look, "OLI-AQUA POLISH 15.95" in "Glossy" refreshes the floor gloss.

The composition of the basic parquet care meets high ecological standards and is particularly economical to use. Simply apply undiluted to the thoroughly cleaned floor with a wiping weasel or a lint-free wide wipe mop in an even thin film, leave to dry - done! A single application is sufficient. After just one to two hours, the floor can be carefully walked on again.

Title: The containers are available as 5-litre canisters and as 1-litre bottles, either individually or in a carton of 6.
