WOODEN WASH EXPERIENCE

Exquisite ideas and award-winning wooden washbasins come from the Paul Neumann joinery in Olsberg in the Sauerland region. The joinery recently won the "Red Dot Design Award 2018" for the CONE INVI wooden washbasin. We are of course proud that the selected designer wooden washbasin is treated with "OLI-NATURA HS 2C Profiöl".

CONE INVI breaks with the materials commonly used for washbasins: its body consists of a machined part of a tree trunk. This characteristic piece of wood is carried by a robust, black painted steel module. The drain, also made of black steel, was milled into the natural growth pattern. It fits perfectly into the annual rings of the tree.

The natural aesthetics are complemented by a practical insert that can be planted. "This makes every wooden washbasin of the CONE INVI series unique - in appearance, shape and size. It is planned and manufactured individually for each customer", says Heiko Neumann, Managing Director of the joinery.

He recently won the "Red Dot Design Award 2018" with CONE INVI. The wooden washbasin impressed the Red Dot jury with its high individuality and its well thought-out construction, which gives also for the nature an effective and stylish space in the bathroom ambience.

Washbasins made of this natural material are already proving to be extremely compatible with the element of water. The washbasins differ in the solid wood used: oak, thermo-ash and accoya. These wood species are naturally very resistant, have antibacterial properties and are moisture-regulating.

The surface of the CONE INVI series is treated with "OLI-NATURA HS 2K Profiöl", which makes water run off easily. At the same time, it highlights the natural grain of the wood and deepens its characteristic colour. This gives the surface a particularly authentic appearance and also sets the stage for the washbasin.
