

PRESS RELEASE 31 May 2017

Naturally allergy friendly

OLI-NATURA hard-wax oil receives the ECARF seal

The "OLI-NATURA hard-wax oil" from Oli Lacke is the first oil/wax combination on the market to receive the ECARF seal. This quality seal distinguishes the oil as a respiratory allergy-friendly product. In addition, it significantly improves the room climate thanks to its permeability properties.

Allergies make life difficult. More and more, people are looking for allergy-friendly and natural products. The "OLI-NATURA hard-wax oil" for wood interiors is the first hard wax oil on the market to have been awarded the quality-tested ECARF seal. This demonstrates its high allergy-friendliness for respiratory allergies. Oli Lacke GmbH produces the oil from modified vegetable oils and waxes such as soybean oil and refined carnauba wax, de-aromatised hydrocarbons, and lead-free and cobalt-free dry materials. This means the use of potentially allergenic substances such as preservatives, formaldehyde, aromatics, biocides, cobalt salts, and oximes can be avoided.

Application study

The ECARF quality seal is awarded to products that contain no or critical ingredients only under strict thresholds and have shown in a scientific application study that they are tolerated by people with respiratory allergies. Awarding the ECARF quality seal for allergy-friendly products is subject to fulfilling strict criteria. The manufacturers must disclose all raw materials and recipes in order to be certified. In a subsequent clinical trial, the product must be compatible with use by people with asthma. If a person does not experience a deterioration of their physical condition within a defined period of time, the product is considered to be compatible with people with sensitive respiratory tracts.

Breathable

The "OLI-NATURA hard-wax oil" is an oxidative drying oil/wax combination. This means that in combination with air oxygen it dries to form an open-pore and breathable surface film. Due to the permeability property, the treated wood can absorb moisture from the room air and release it into the air if necessary. This improves the room climate noticeably and increases the well-being of people. At the same time, the hardened material is resistant to saliva and sweat and safe for humans, animals, and plants.

User-friendly

"OLI-NATURA hard-wax oil" is extremely light and versatile to work with. It protects almost all types of wood in the interior – whether it's furniture, stairs or hallway, whether oak, pine or beech. It can be easily applied with a brush, roller, or spray gun in one or two work steps depending on the application. Even with a single application, the material achieves good wood saturation and an even surface, which has a slightly shinier effect without polishing. The wood has a noticeably natural, matte surface due to the careful padding in the wet phase. The hard-wax oil is deeply massaged into the wood. "OLI-NATURA hard-wax oil" is impressive in the stain resistance test with excellent resistance to household chemicals and liquids. In addition, the hard-wax-treated surface can be easily reworked, in contrast to painted surfaces. The area concerned can be partially sanded and oiled. The result subtly emphasises the natural wood colour and gives the surface a silky feel.

PRESSEMITTEILUNG - Kurzversion

31. Mai 2017

Natürlich allergikerfreundlich

OLI-NATURA erhält als erstes Hartwachsöl ein qualitätsgeprüftes Siegel für allergikerfreundliche Produkte.

Das OLI-NATURA Hartwachsöl für innen ist das erste Hartwachsöl auf dem Markt, welches mit dem ECARF-Siegel und damit als allergikerfreundliches Produkt für Atemwegsallergie ausgezeichnet wurde. Die Vergabe des ECARF Qualitätssiegels für allergikerfreundliche Produkte ist an die Erfüllung strenger Kriterien gebunden. Die Oli Lacke GmbH verzichtet bewusst auf den Einsatz potenziell allergieauslösenden Substanzen wie etwa Konservierungsmitteln, Formaldehyd sowie Bioziden. Hergestellt wird das Öl aus modifizierten pflanzlichen Ölen und Wachsen wie Sojaöl und veredeltem Carnaubawachs.

Atmungsaktiv

Das OLI-NATURA Hartwachsöl trocknet in Verbindung mit Luftsauerstoff zu einem offenporigen und atmungsaktiven Oberflächenfilm aus. Aufgrund der diffusionsoffenen Eigenschaft kann das Holz Feuchtigkeit aus der Raumluft einlagern und bei Bedarf wieder abgeben. Das verbessert spürbar das Raumklima. Zugleich ist das ausgehärtete Material speichel- und schweißecht und unbedenklich für Mensch, Tier und Pflanze.

Anwenderfreundlich

Das extrem leicht und vielseitig zu verarbeitende OLI-NATURA Hartwachsöl schützt nahezu alle Holzarten im Innenbereich und lässt sich einfach mit Pinsel, Rolle oder Spritzpistole je nach Einsatzbereich in ein bis zwei Arbeitsgängen verarbeiten. Selbst bei einmaligem Auftragen erzielt das Material eine gute Holz sättigung und gleichmäßige Oberfläche. Das Ergebnis unterstreicht dezent den natürlichen Holzfarbton und gibt der Oberfläche eine seidige, matte Haptik. Ohne Auspolieren wirkt die Holzoberfläche etwas glänzender.
